Elements Exposure Management 2.0

- Last year we launched **Elements Exposure Management** during the SPHERE24 event, and during the last year we have seen a massive amount of interest in the solution. But we don't rest on our laurels, we've been adding new features all through the year.
- This year we're happy to announce the following significant improvements:
- **Boost the efficiency of your Elements XM experience** with Luminen GenAI's localized remediation instructions.
- **C-suite Reporting** shows the value of your exposure management activities as an Executive Summary.
- **Secure your hybrid attack paths (on-premises + cloud)** with advanced threat protection against the latest cloud and identity threats.
- **Quickly demonstrate Elements XM's value** with the new in-product sales demo environment.
- Enjoy the streamlined **Elements XM onboarding experience**.
- **Send Elements XM recommendations** to ticketing and SIEM systems via API.

Elements XDR Cloud Security for Azure

- All new at SPHERE25 is our **Elements XDR Cloud Security for Azure**.
- As more and more organizations start transitioning to hosting some or all of their infrastructure in Azure, it is really important that they secure their Azure cloud environment. **Elements XDR Cloud Security for Azure** is just what they need.
- **Ease the path to your cloud transformation**
- Enable your cloud transformation by securing Azure cloud resources, ensuring your critical company data is kept safe when you move to the cloud or use hybrid setups (cloud + on-premise).
- **Minimize financial losses due to data breach**
- Reduce your business risk and minimize financial loss from breaches by having security controls that enable quick response to cloud incidents.
- **Fortify operational processes in the cloud**
- Keep your cloud infrastructure operational with reduced business risk, continued cloud-based service availability, and minimized operational downtime.

WithSecure Elements Infinite

- For several years, we have had WithSecure Elements, bringing solutions such as Endpoint Security, Collaboration Protection, and more recently Exposure Management in a single unified Security Center.
- And we've also had WithSecure Countercept, a separate, fully-managed MDR solution.
- This year at SPHERE25 we are excited to announce that the WithSecure Countercept service is now part of the WithSecure Elements ecosystem, and is now called **WithSecure Elements Infinite**, bringing everything under the same unified Security Center.
- **Turnkey Premium Solution – Always On**
- Fully managed, SLA-backed and human delivered premium security service. 24/7/365 monitoring of your environment by certified Threat Hunters.
- **From Pre-Incident to Post-Incident protection – Full Process Coverage**
- Continuous improvement of your security posture and cyber resilience. We help you meet your compliance obligations.
- **Build a True Partnership - Dedicated Human Resources at Your Service**
- Our certified threat hunters and cyber security experts together with the customer management team act as an extension of your internal security team, handling the heavy lifting for you.

WithSecure Luminen

Partners and customers who have WithSecure Elements also have access to the Luminen GenAI assistant, introduced last year at SPHERE24. Over the last year we have been improving the Luminen skills, and we currently have the following:

1. Summary reports with Security Awareness Assistant

- The reports summarize security events within the last 7 days, and in multiple local languages.

2. Investigation Assistant

- Natural language explanations of Broad Context Detections™.
- Immediate assistance to the user to understand the detections in context.
- Investigation Assistant for endpoint, cloud and identity BCDs.

3. Luminen for Exposure Management (New in 2025!)

- Luminen can now give recommendations for exposures in localized languages.

- **NEW!** With the new Security Awareness Assistant, you gain a comprehensive 360 situational awareness for your assets, whether you use Elements as a product or service. Luminen now seamlessly unifies proactive and reactive security measures, enhancing your overall protection.
- We are also working on additional functionality for Luminen that will be available as a future subscription add-on, **Luminen Pro**. This will be included as part of the **Elements Infinite** subscription.
- The list of capabilities are still being finalized, but candidates include the Threat Assistant, use of Luminen over the Elements API, GenAI supported reporting, and customer XM recommendations.

What to do next

As with all WithSecure offerings, these new products and services are available through our wide partner network.

If you would like to find out more about these new products and services, please reach out to your WithSecure Sales Representative.
